

Redica Insights for Pharma and Biopharma

Data analytics for simpler, smarter quality and regulatory intelligence.

To make meaningful enforcement planning and decision making, you need reliable, real-time, and high-quality sources for a broad set of regulatory data. Current approaches fall short due to difficulties in acquiring high-quality datasets, handling varying velocities of data delivery, and normalizing across multiple data formats. All of this makes it impossible to organize. Redica Systems is here to help pharma and biotech firms make sense of all these datasets to turn it into meaningful information.

GENERAL CRITICAL PHARMA AND BIOPHARMA INSIGHTS WITH ACTIONABLE DATA INTELLIGENCE

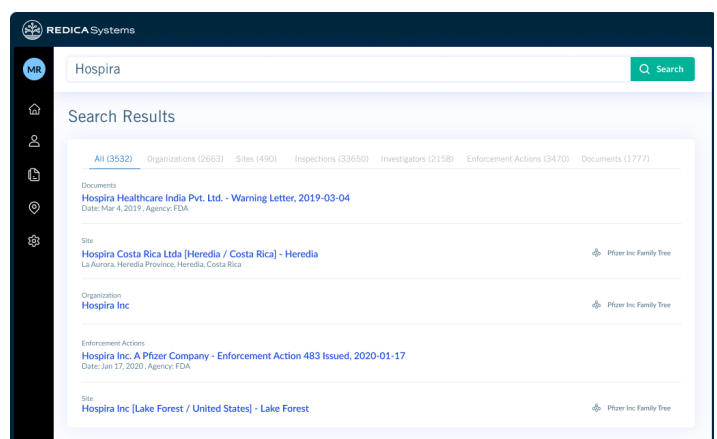

We'll help you search, analyze, and derive valuable insight from thousands of FDA, EMA, Health Canada, MHRA, and WHO data points covering pharmaceutical and biotech facilities, products, organizations, and enforcement.

Tailor insights to your specific compliance and risk concerns
